HUMIC [K] WSP

100% SOLUBLE, POTASSIUM HUMIC ACID POWDER

ANALYSIS: HUMIC ACID 65%, FULVIC ACID 7%, POTASSIUM 10% (CDFA METHOD)

Pack size 25kg

From the Worlds # 1 Potassium Humate Manufacturer

Superior Quality

- The purest humic acid sourced from the US.
- A humic acid source which contains high concentrations of humic and fulvic acids.
- Contains very low levels of heavy metals.

Applications

- Solubilise to a liquid for fertigation.
- Coat NPK granular fertilisers.

OMRI® LISTED For Organic Use

Diamond Grow®

MADE IN THE USA

HUMIC[K]WSP

100% SOLUBLE, POTASSIUM HUMIC ACID POWDER

Key Features and Benefits

- Solubilisation of nutrients (e.g. Fe, Zn, Mn, K, Ca, P)
- Buffers salts to reduce burning
- Forms a bond with the fertiliser preventing “tie-up”
- Increases soil water holding capacity
- Increases soil cation exchange capacity
- Increases soil microbial activity

Table 1: HUMIC[K] WSP Analysis and Particle Size

Product	Method of Humic Acid Content Analysis				
	Colour Metric	CDFA	NEU	ISO	Particle Size
HUMIC[K] WSP	95 - 99%	63 - 68%	60 - 65%	84 - 89%	0.005 mm

Directions for Use

HUMIC[K] WSP Application Rates:

Dry Product: 6-15kg/ha applied throughout the crop cycle, divided into 4-5 applications.

HUMIC[K] WSP Mixing instructions for 12% w/w:

- The addition of an anti-foaming agent may be helpful during the solubilisation process.
- Mix 1kg in 8L water or equivalent to 125kg in 1000L water with agitation.
- Prior to application mix the concentrate in the ratio of 1L concentrate to 4L water or add to tank mixture at desired concentration.
- Apply the concentrate mixture at 30 - 80L/ha, divided into 4 - 5 applications.

Always read the entire label prior to use.
