

# HUMIC[K]WSP

100% SOLUBLE, POTASSIUM HUMIC ACID POWDER

ANALYSIS: HUMIC ACID 65%, FULVIC ACID 7%, POTASSIUM 10% (CDFA METHOD)

From the Worlds # 1  
Potassium Humate  
Manufacturer

## Superior Quality

- The purest humic acid sourced from the US.
- A humic acid source which contains high concentrations of humic and fulvic acids.
- Contains very low levels of heavy metals.

## Applications

- Solubilise to a liquid for fertigation.
- Coat NPK granular fertilisers.

AGRICROP

Products for Plants

# HUMIC[K]WSP

100% SOLUBLE, POTASSIUM HUMIC ACID POWDER

## Key Features and Benefits

- Solubilisation of nutrients (e.g. Fe, Zn, Mn, K, Ca, P)
- Buffers salts to reduce burning
- Forms a bond with the fertiliser preventing "tie-up"
- Increases soil water holding capacity
- Increases soil cation exchange capacity
- Increases soil microbial activity

**Table 1: HUMIC[K] WSP Analysis and Granule Size**

Product	Method of Humic Acid Content Analysis				
	Colour Metric	CDFA	NEU	ISO	Granule Size
HUMIC[K] WSP	95 - 99%	63 - 68%	60 - 65%	84 - 89%	0.005 mm

## Directions for Use

**Pack size 25kg**

## HUMIC[K] WSP Application Rates:

**Dry product:** 6 - 15kg/ha applied throughout the crop cycle, divided into 4-5 applications.

### Mixing instructions for 12% w/w : HUMIC[K] WSP

The addition of an anti-foaming agent may be helpful during the solubilisation process.

Mix 1kg in 8L water or equivalent to 125kg in 1000L water with agitation.

Prior to application mix the concentrate in the ratio of 1L concentrate to 4L water or add to tank mixture at desired concentration.

Apply the concentrate mixture at 30 - 80L/ha, divided into 4 - 5 applications.

**SAFETY & FIRST AID:** HUMIC[K] WSP is a non DG and a non-hazardous compound. For specialist advice in an emergency phone 1800 033 111 Australia wide. If poisoning occurs contact a doctor or Poisons Information Centre on 13 11 26. For a product Safety Data Sheet visit our website at [www.agricrop.com.au](http://www.agricrop.com.au).
